

Level 1 Pi Day Puzzle

Three children (Emily, Gavin, and Matthew) are going to celebrate Pi Day together. The children plan to eat pie and draw shapes from geometry. Each child prefers a different type of pie (apple, blueberry, or pumpkin) and likes to draw a different shape (circle, square, or triangle). Can you match each child with the correct shape and pie flavor?

- 1) Matthew can draw a triangle if you ask him to, but there's another shape he likes better.
- 2) Emily likes any kind of pie, but apple pie is her absolute favorite.
- 3) Gavin is not a big fan of pumpkin pie, and neither is the child who likes to draw squares.

	circle	square	triangle	apple	blueberry	pumpkin
Emily						
Gavin						
Matthew						
apple						
blueberry						
pumpkin
