

## Level 2 Pi Day Puzzle

In honor of Pi Day, three children (Isabel, Justin, and Rebecca) were asked to name their favorite round food item. Each child gave a different answer (donut, pie, or pizza). Then, the three children were each told to pick a digit from the number 3.14, which is very close to the number pi. Each child picked a different digit (1, 3, or 4). Can you figure out which food item and which digit was chosen by each child?

- 1) The donut-lover (whose name is not Justin) chose the largest digit.
- 2) Rebecca and the pie-lover both chose digits that are larger than the pizza-lover's digit.
- 3) Isabel chose a digit other than 1.

	donut	pie	pizza	1	3	4
Isabel						
Justin						
Rebecca						
1						
3						
4
